

NEBO[®]

TORCHY™ UV

& BLACK LIGHT

Engineered with Dual UV-A (Ultraviolet A) Technology for better detection, inspection, and authentication in both residential and commercial applications. The broad-spectrum wavelengths provide a blended illumination and fluorescence that is ideal for close-range tasks such as detection of pet urine, inspection of auto leaks with UV dyes, pest detection such as scorpions, cleaning inspections, and authentication of currency. Compact and pocketable, this light is constructed with a durable aluminum housing that is impact-resistant and water-resistant. Battery powered with three AAA batteries (included).

LIGHTING MODES

- High 2.5 hours
- Low 8 hours

DESIGN FEATURES

- Dual UV-A Technology (2x 395nm + 1x365nm LEDs)
- Alkaline (3x AAA Batteries)
- 2 Light Modes (High – Low)
- Push Button Operation
- Aluminium Construction
- Water-resistant IPX4 Rating
